## 4.1 formulas

The follwoing formulas havs been used in order to perform the derivations tell what i mean

$$\psi_2 = \frac{ike^{ikR}}{4\pi R}(Fv - p) * \int_S ne^{ikvs} \tag{1}$$

explain me

$$\begin{aligned} L_\lambda(\omega_r) &= \int_\Omega BRDF_\lambda(\omega_i, \omega_r) L_\lambda(\omega_i) cos(\theta_i) d\omega_i \\ &= xyz \\ &= t \end{aligned}$$

### 4.2 derivation

$$
\begin{aligned}
L_\lambda(\omega_r) &= \int_\Omega BRDF_\lambda(\omega_i, \omega_r) L_\lambda(\omega_i) cos(\theta_i) d\omega_i \\
&= \int_\Omega BRDF_\lambda(\omega_i, \omega_r) L_\lambda(\omega_i) cos(\theta_i) d\omega_i \\
&= t
\end{aligned}
$$
